

Special Inspections Final Certification Report

Purpose: This form serves as a confirmation that special inspections have been conducted in accordance with a project's Special Inspections & Testing Agreement, Statement of Special Inspections (SSI), and Chapter 17 of the International Building Code (IBC).

Instructions: This form shall be completed by the special inspections engineer of record (SIER) by identifying project information and applicable special inspections activities below. If there were more than one SIER for differing types of special inspections, each SIER shall submit separate versions of this form for their responsible activities. Use the blank rows in the Special Inspections Activity table to identify other special inspections included in the SSI.

ACKNOWLEDGEMENT

As the SIER, I hereby certify that the special inspections and testing activities identified above for this project have been completed by me or by qualified person(s) under my supervision and meet the requirements identified in the Special Inspections & Testing Agreement, the SSI, and IBC Chapter 17. The building elements subject to special inspections and materials testing have been found to be in compliance with the approved construction documents and project specifications. Discrepancies discovered during the course of inspections were brought to the attention of registered design professional in responsible charge, the general contractor, and the Building Safety Division for resolution and have been corrected according to approved plans and/or approved changes. Pursuant to applicable state law for professional engineers, this certification is based upon my knowledge, information, and belief; is in accordance with applicable standards of practice; and is not a guarantee or warranty, either expressed or implied.
