

Residential Solar Installation Certification

Instructions: This certification applies to solar rooftop installations associated with one- and two-story homes up to three stories and must be completed by a state-licensed journeyman or master electrician employed by a Commerce City-licensed electrical contractor. By completing this form, you are certifying the code-compliant installation of solar panels and associated rooftop equipment and wiring. You must upload a completed copy of this form to your eTrakit portal when the installation has been completed. Also, ensure a completed copy is onsite and available to the city's electrical inspector during inspection. Failure to submit this form within six months of project completion could result in the issuance of a notice of violation.
